

## How to Make Origami Duck

### Step 1: Make the body

Place the paper with the colored side facing down. In this tutorial, I am using a double sided paper with blue on one side and green on the other. I am making a blue duck, so the blue side is facing down and the green side of the paper is facing up.

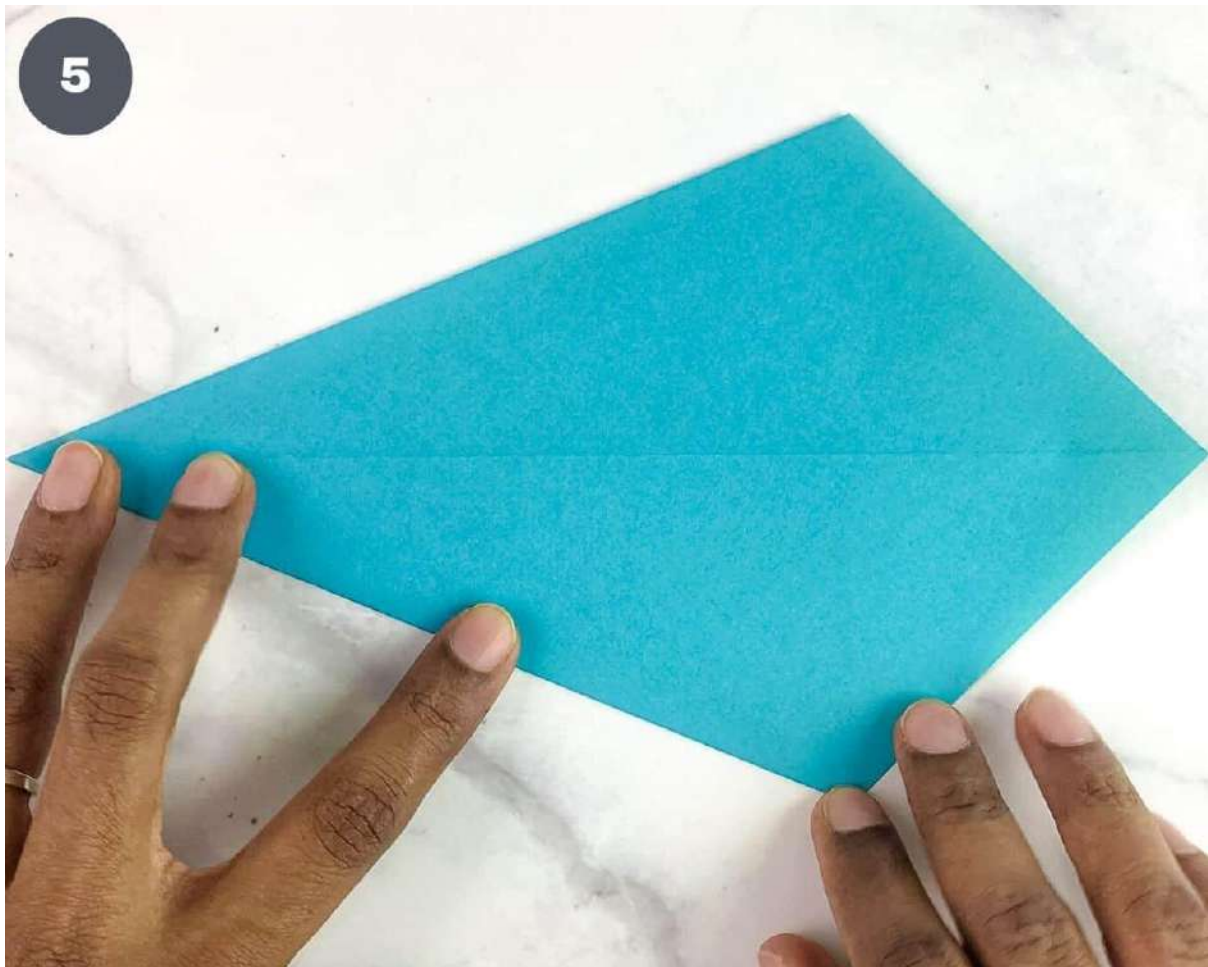

Fold the paper diagonally by bringing the left bottom corner to the top right corner. Press the fold firmly and then unfold. Turn the folded paper as shown (**images 1 & 2**).

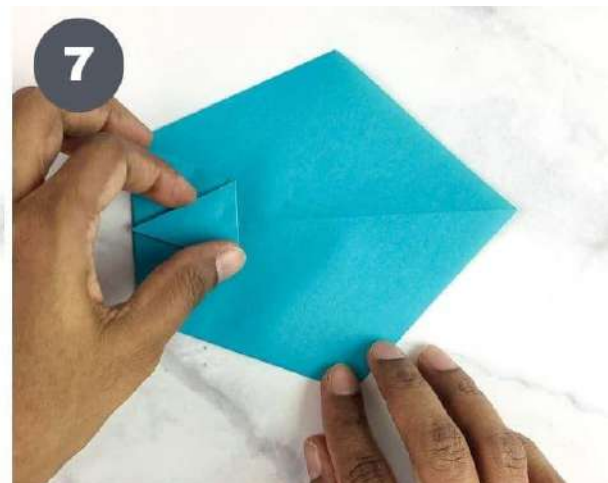

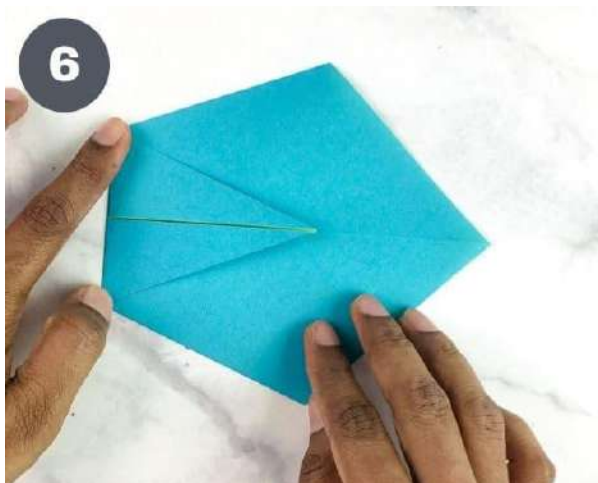

Place the paper down with the folded crease line in the previous step above positioned horizontally. Bring the top left edge to the center crease line. Press the fold (**image 3**).

Repeat with the bottom left edge (**image 4**).

Step 2: Fold the head

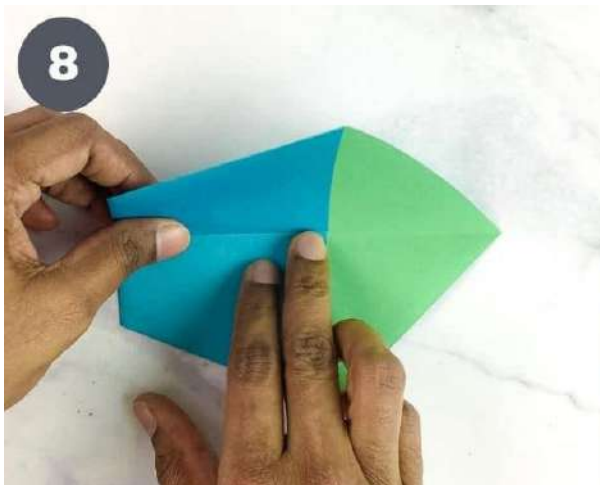

Next step is to make the head. Turn the paper over (**image 5**).

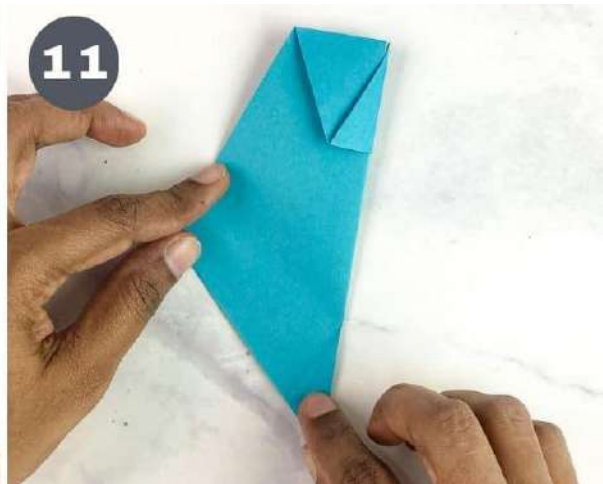

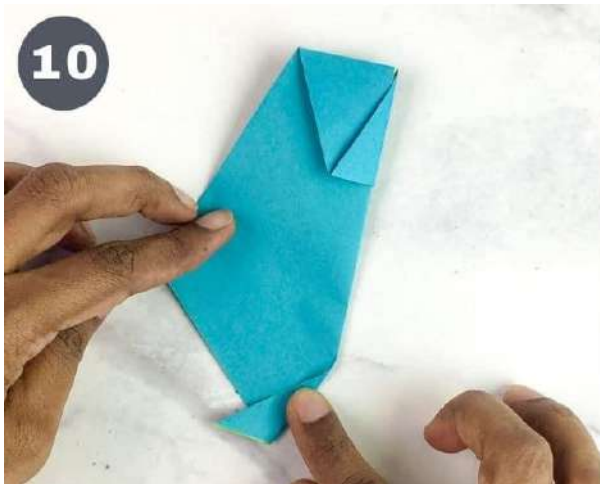

Bring the pointed end on the left to the right, stopping it at the intersection of the top and bottom corners as well as the right and left corners. Press the fold (**image 6**).

Lift the same pointed end and fold in back to the left, with the tip placed exactly at the fold in the step above (**image 7**).

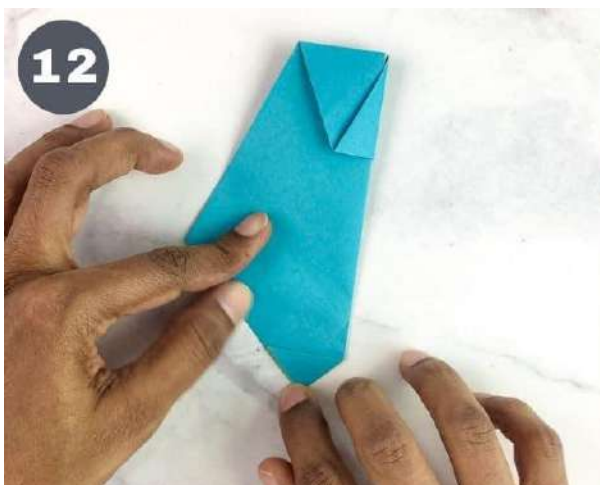

Step 3: Fold the tail

Turn the paper over and fold it horizontally along the line that is already present horizontally on the paper (images 8 & 9).

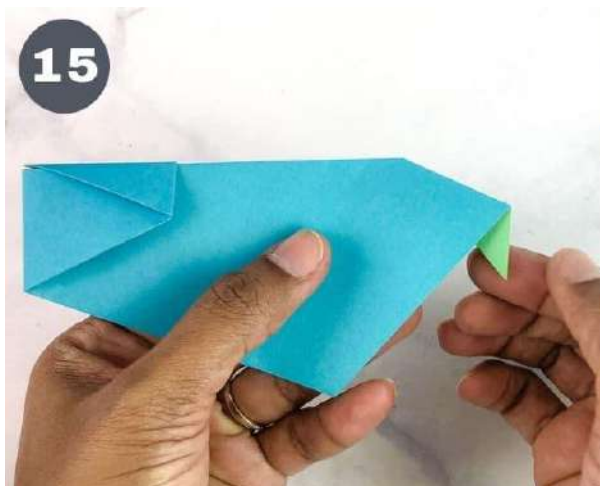

Place the paper as shown. Lift the bottom tip and fold it to the left. Unfold (images 10 & 11).

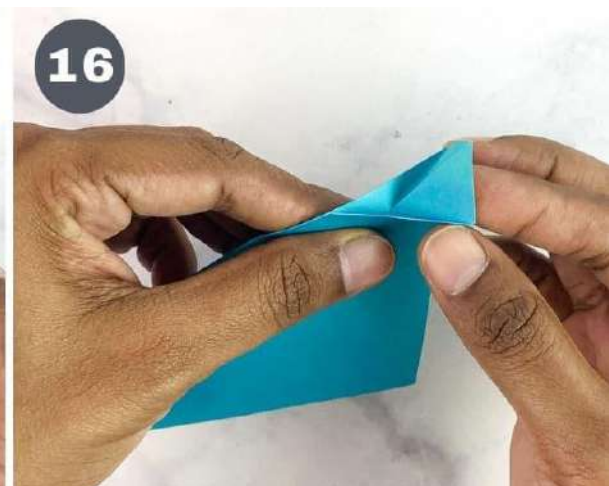

Re-fold the tip as shown (image 12). Press the fold and unfold the paper (image 13).

Open up the fold made earlier (**image 14**).

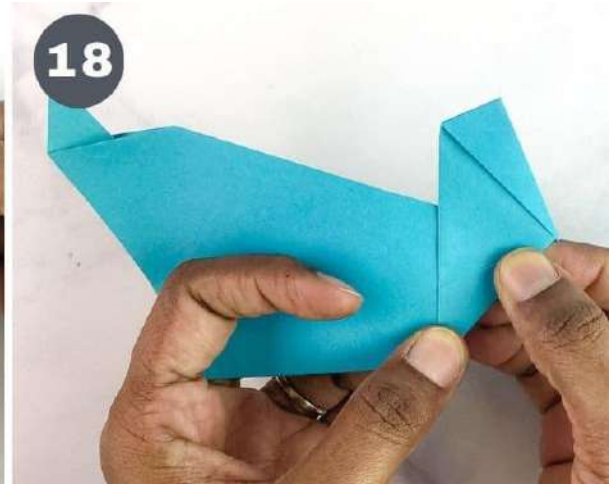

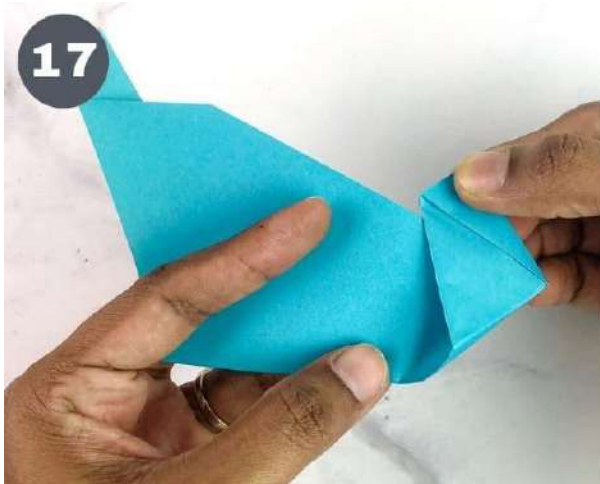

Push the tail inside along the first set of folded lines as shown (**image 15**).

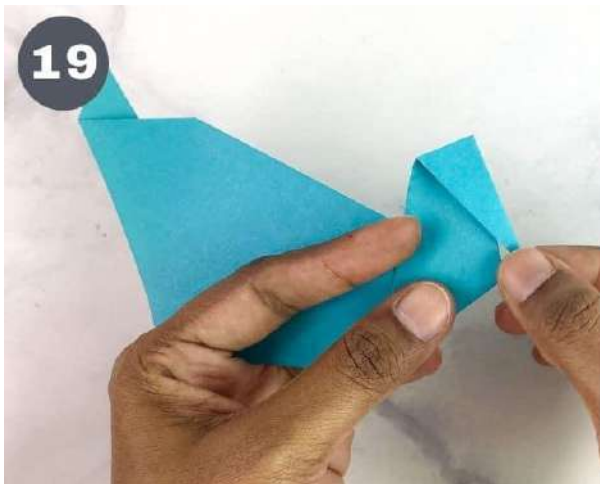

Push it up again along the second set of folded lines (**image 16**) to complete the tail.

Step 4: Bring out the head and draw the eyes

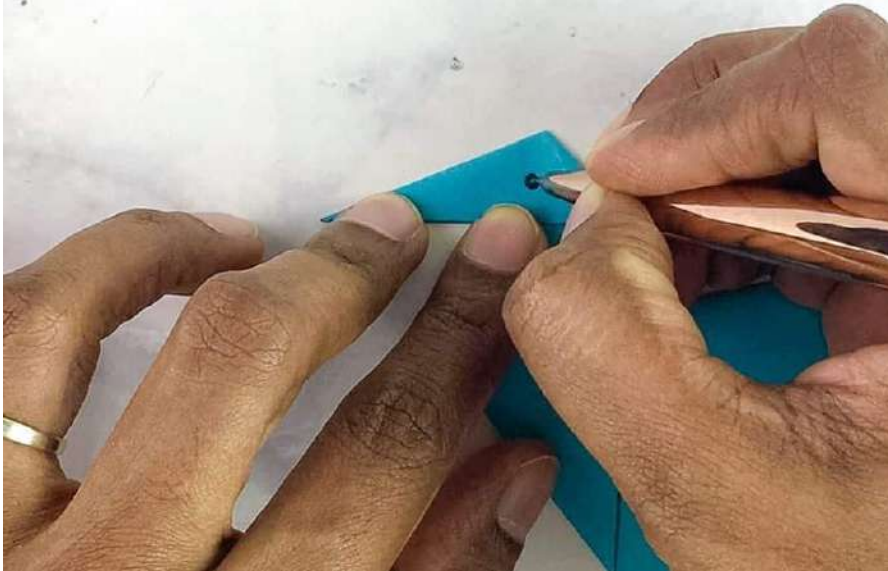

Hold the head section as shown (**image 17**) and gently pull it up to form the neck. Press the folds to hold it in position at an angle you prefer (**image 18**).

Next, hold the pointed tip and pull it up to form the beak. Press the folds to hold it in position (**images 19 & 20**).

21

Draw the eyes on both sides of the duck's face with a black pen to complete the origami duck (image 21).
